

BIG BOX WORKSHOP

BECAUSE BIG KEEPS GETTING BIGGER

A two-day workshop examining big box structures & their impact on the fire service.

Today's big box structures dwarf the warehouse superstores of previous decades. Once unique to rural areas, mega-size distribution centers & warehouses are popping up all over the country. These mammoths can span well over 1 million square feet, presenting unique response challenges. We cannot apply residential strategies & tactics in big box structures!

Join us for this essential course. We will discuss:

- Big box critical factors
- Fire-protection systems
- Pull up & hook up (NFPA 13E)
- Why we slow down on big box fires
- The Standard Decision-Making Model
- The big box life-safety profile

Plus! Multiple Big Box Exercises Using S/D Bosses

Featuring Shane Ray, President National Sprinkler Association
July 7 and 8 2025. 0800-1700
